Cesarean Section for All Twins?

November 01, 2011 | IVF [1], Infertility [2], Pregnancy and Birth [3]
By Isaac Blickstein, MD [4]

According to B. Russell’s “bad luck” mathematical paradox, a decision is bound to be false if based on the probability of success of another decision. Thus, a decision to perform a cesarean section (CS) based on the probability of a successful vaginal delivery (VD) is likely to be wrong.
