Presentation Details:

Slides: 1

Duration: 00:01:02

Presenter Details:

Charles E. Miller, MD

Clinical Associate Professor, Dept OB/GYN

University of Illinois at Chicago

Clinical Associate

Department of OB/GYN

University of Chicago

Bio: Dr Charles E. Miller, a graduate of Northwestern University's Honors Program in Medical Education, Chicago, completed his residency in Obstetrics and Gynecology at Parkland Memorial Hospital, University of Texas Southwestern Medical School, Dallas, Texas. He then served a Fellowship in Reproductive Endocrinology and Infertility at the University of Pennsylvania, Philadelphia.

After completing his training, Dr Miller was appointed Director of Reproductive Endocrinology and Infertility at Lutheran General Hospital, Chicago, and subsequently was named Chairman of Gynecologic Endoscopic Surgery at that institution. Dr Miller also was the Medical Director and Director of Minimally Invasive Gynecologic Surgery at the Center for Human Reproduction, Chicago.

Currently, Dr Miller is Clinical Associate Professor in the Department of Ob/Gyn, University of Illinois, Chicago, and Clinical Associate in the Department of Ob/Gyn, University of Chicago, Chicago. In addition to his academic duties, he is in private practice at Charles E. Miller and Associates—Specialists in Reproductive Health, in Naperville and Arlington Heights, Illinois. Among other professional activities, he also Secretary/Treasurer for the American Association of Gynecologic Laparoscopists (AAGL), an Editorial Advisor for the American Association of Gynecologic Laparoscopists, a National Advisor for the American Association of Gynecologic Laparoscopists, an Editorial Board Member and Editor of the Master's Class surgical tutorial for Ob./Gyn. News.

NEW OPTIONS FOR THE MANAGEMENT
OF FIBROIDS IN THE OB/GYN PRACTICE

OBGYN.net

Notes:

The new technology represented by ExAblate 2000 presents both challenges and new opportunities for the Ob/Gyn clinician. If we, in our specialty do not offer new, effective and safe options such as Magnetic Resonance-guided-focused ultrasound surgery, patients will seek other avenues to obtain these therapies. Let's face it ladies and gentlemen, it's already happened. That's Uterine Artery Embolization, Uterine Fibroid Embolization. Therefore, Ob/Gyn clinicians must determine whether and how to incorporate such new treatments into our practice.

Here's how you can learn more about this new, exciting technology. Thank you for watching this program, have a great day.
